Sl: No:	Test Case Name	Test Procedure	Condition to be tested	Expected Result	Actual Result	US ID
1	Document upload	Open the Streamlit app and upload a supported financial PDF (e.g. an annual report).	Uploaded file is a valid PDF.	The application accepts and saves the uploaded file.	File accepted and saved as expected.	US/105
2	PDF text extraction	Run PDF extraction on an uploaded annual report.	PDF contains selectable text.	Text and page information are extracted for the document.	Text and page information extracted as expected.	US/105
3	Document chunking	Run chunking on the extracted text of one report.	Extracted document text is available.	Text is divided into smaller chunks with page/source information retained.	Chunks created with page/source details retained.	US/105
4	Embedding generation	Generate embeddings for the chunks of one report.	Chunks are available.	An embedding is generated for every chunk.	Embeddings generated for all chunks.	US/105
5	Vector database indexing	Add chunks, embeddings and metadata to the ChromaDB collection (financial_documents).	Embeddings and metadata are available.	Chunks are stored with metadata and can be retrieved; existing records are preserved.	Chunks and metadata stored in ChromaDB and retrievable; existing records preserved.	US/105
6	Seed documents	Start the application and check the indexed documents.	3-4 seed company documents are expected to be preloaded.	Seed documents are available for retrieval without a manual upload.	Seed documents available after startup.	US/105
7	Create research session	Create a new named research session in the workspace.	A session name is entered.	A named research session is created and listed in the workspace.	Named session created and shown in the workspace.	US/104
8	Manage session documents	Add and view uploaded documents within a research session.	A research session exists.	Uploaded documents are organized under the session.	Uploaded documents listed under the session.	US/104
9	Extract revenue and profitability	Run the Extraction Agent on an indexed annual report.	Report contains revenue and profit figures.	Revenue and profitability figures are extracted and match the source document.	Revenue and profit figures matched the source report.	US/106
10	Extract financial ratios	Run the Extraction Agent on an indexed annual report.	Report contains the data needed for financial ratios.	Financial ratios and key performance figures are extracted correctly.	Ratios and key figures extracted; matched source values.	US/106
11	Revenue trend extraction	Run the Extraction Agent on reports covering multiple years.	Multi-year data is indexed.	Revenue trend across years is returned with the correct fiscal years.	Revenue trend returned for the correct fiscal years.	US/106
12	Units and fiscal period handling	Extract the same metric from reports of different companies.	Reports use different currencies, units or fiscal-year ends.	Values are reported with correct units and fiscal periods.	Correct units and fiscal years returned after fixes to earlier unit-scaling and fiscal-year issues (see Defect Tracker).	US/106
13	Red flag - rising debt	Run the Red Flag Agent on a document showing rising debt.	Debt levels increase across periods.	Rising debt is flagged with supporting evidence from the document.	Rising debt flagged with supporting text from the document.	US/107
14	Red flag - falling margins	Run the Red Flag Agent on a document showing falling profit margins.	Profit margins decline across periods.	Falling margins are flagged with supporting evidence.	Falling margins flagged with supporting figures.	US/107
15	Red flag - auditor qualification	Run the Red Flag Agent on a document containing an auditor qualification.	Audit report contains a qualification.	The auditor qualification is flagged and traced to the source text.	Auditor qualification flagged and traced to source text.	US/107

16	Red flag - anomalies and unusual patterns	Run the Red Flag Agent on documents with unusual financial patterns.	Anomalous figures are present.	Anomalies and unusual patterns are identified using document evidence.	Anomalies identified from document evidence.	US/107
17	Red flag - no unsupported flags	Run the Red Flag Agent on a document without warning signs.	No red-flag conditions are present.	No flags are invented; output is based only on document evidence.	No flags raised for a document without warning signs.	US/107
18	Orchestration on upload	Upload a document and observe the agent workflow.	A document is uploaded.	Document, Extraction and Red Flag agents run in sequence and pass their outputs correctly.	Agents ran in sequence and passed outputs correctly.	US/108
19	Research - single question	Ask a financial question answerable from an indexed document.	Relevant document is indexed.	A grounded answer is returned with a source citation.	Grounded answer returned with source citation.	US/110
20	Research - multi-part question	Ask a question containing several parts.	Relevant documents are indexed.	Each part is answered step by step with citations.	Each part answered step by step with citations.	US/110
21	Research - metric available but reported missing	Ask the Research Copilot for a metric that Visual Analytics can retrieve.	Metric exists in the indexed data.	Research Copilot returns the metric instead of an insufficient-information message.	Insufficient-information message still returned for some queries even though the metric is available in Visual Analytics (see Defect Tracker, US/110).	US/110
22	Research - unsupported question	Ask a question not covered by the indexed documents.	No relevant content is indexed.	The agent states information is insufficient rather than inventing an answer.	Insufficient-information response returned; no answer invented.	US/110
23	Comparison - side by side	Compare the same metric for two or more indexed companies.	Documents for multiple companies are indexed.	Metrics are shown side by side for the companies.	Metrics displayed side by side for the selected companies.	US/111
24	Comparison - comparable basis	Compare companies with different reporting periods or units.	Reports differ in period, unit or currency.	Comparison uses comparable periods, units and reporting bases.	Comparison used comparable periods and units.	US/111
25	Chat interface	Type a financial question in the chat interface.	Documents are indexed.	A cited, reasoned response is displayed in the chat.	Cited, reasoned response displayed in the chat.	US/112
26	Report - Executive Summary	Generate a report for a company.	Agent outputs are available.	The report includes an Executive Summary.	Executive Summary section generated.	US/113
27	Report - Key Financials	Generate a report for a company.	Extraction output is available.	The report includes a Key Financials section matching the source data.	Key Financials section generated and matched source data.	US/113
28	Report - Red Flags	Generate a report for a company.	Red Flag output is available.	The report includes a Red Flags section.	Red Flags section generated.	US/114
29	Report - Company Comparison	Generate a report for multiple companies.	Comparison output is available.	The report includes a Company Comparison section.	Company Comparison section generated.	US/114
30	Report - Outlook	Generate a report for a company.	Agent outputs are available.	The report includes an Outlook section.	Outlook section generated.	US/114
31	Report - PDF generation	Run the full report workflow end to end.	All agents have produced output.	A complete structured PDF report is generated and can be opened.	Structured PDF report generated and opened successfully.	US/114
